

1a) Pressing **ENTER** closes a card after I've entered text in the **Description** field.

1b) If possible, could **SHIFT + ENTER** do a carriage return when I am in the text field?

2) On boards with a lot of lists, the background image runs out after a while when scrolling horizontally.

+ Add a card

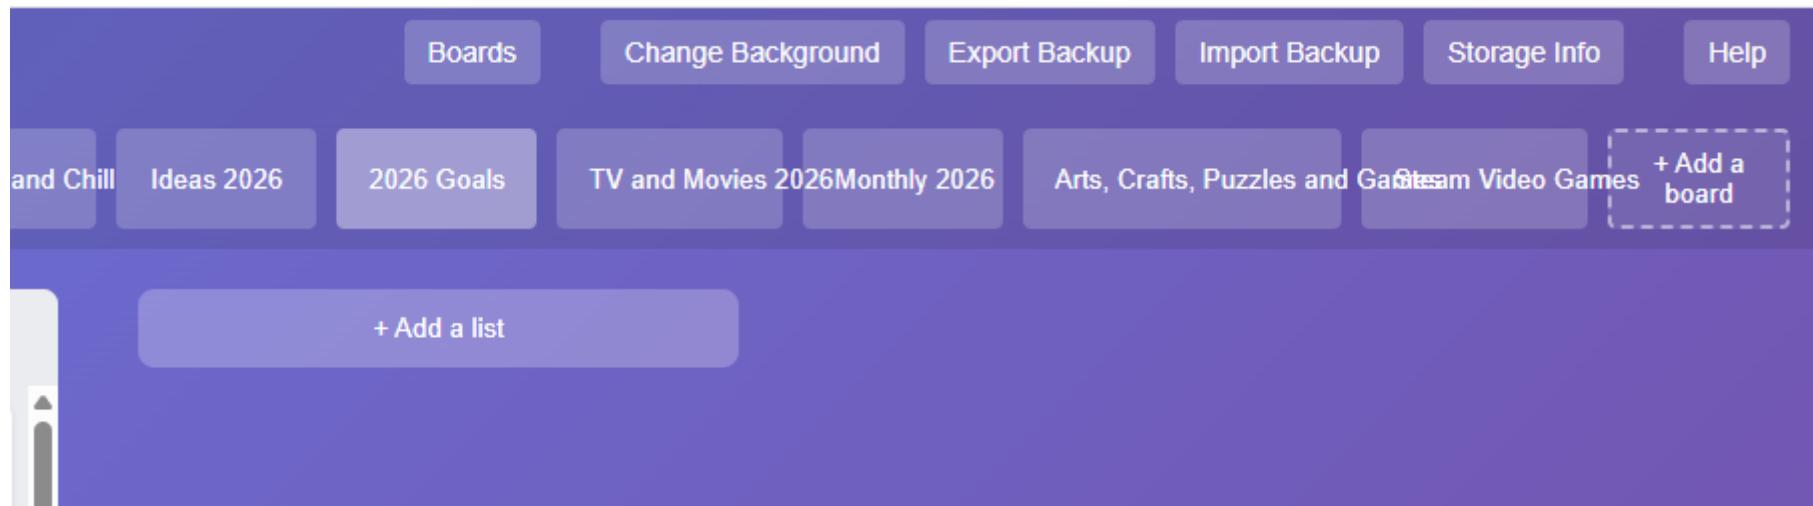

3a) Can there be an option on this menu to duplicate a list on the same board?

3b) If possible, can there be an option on this menu to duplicate a list a different board?

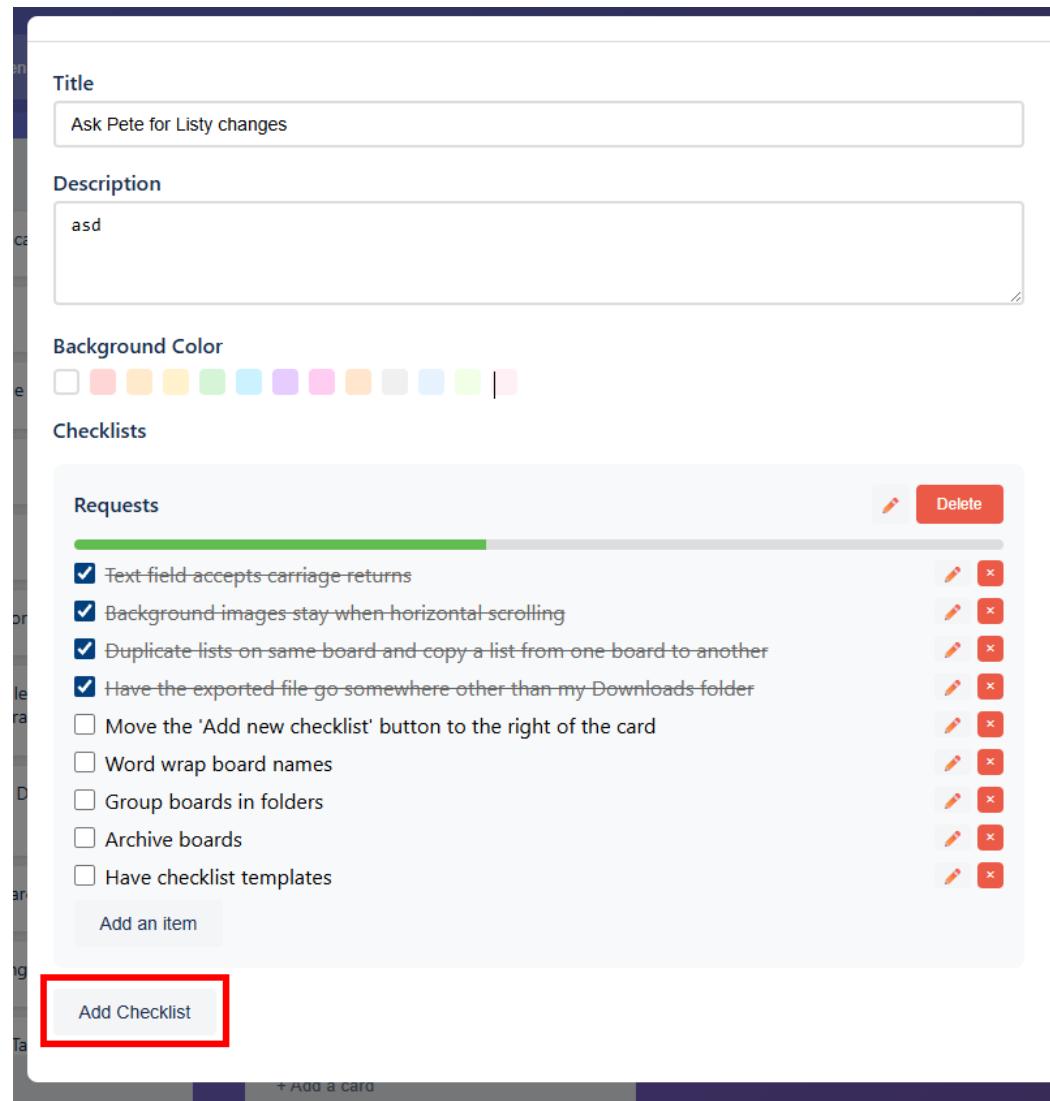

4a) Change Export Backup to Save Boards.

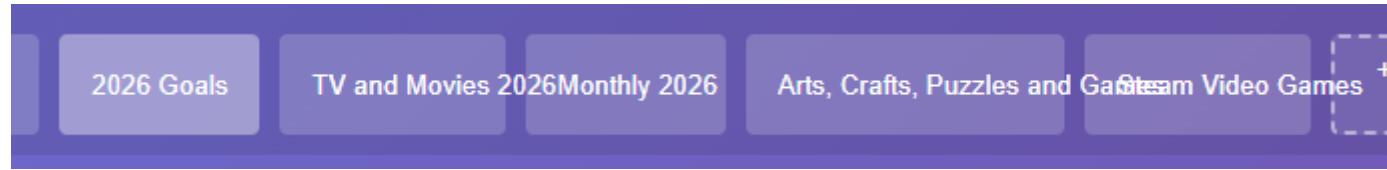

4b) Can the backups be saved somewhere that is not my Downloads folder?

5) Move the **Add Checklist** button to the right side of the card. I keep accidentally clicking it when I want to add a new item.

6) Word wrap board names on the buttons.

7) Is it possible to group boards? For example, it would be great if I could put all of my 2025 boards together in one folder.

... these appear.

8) Is it possible to create checklist templates so I don't have to type each item in the checklist separately? For example, useful templates could include:

- Days 1-31
- Lesson 1 to 30
- Episode 1 to 12
